

SYNTHETIC RESUME - STRONG MATCH

AI Solution Engineer | 5 years

Led 12 stakeholder workshops and owned requirements for six production AI systems.

Led Python LLM application delivery using prompt engineering and context engineering.

Improved grounded-answer accuracy from 72 to 91 percent through prompt evaluation.

Built NLP and machine-learning pipelines and led a 500-case failure evaluation.

Owned FastAPI and JSON integrations with Gemini and OpenAI SDKs at 10,000 requests per day.

Led production deployment with software engineers and maintained 99.9 percent availability.

Built n8n, SQL, Docker, Cloud Run, and CI pipelines that reduced release time by 70 percent.

Relevant education: MSc Data Science and applied NLP certification.

Measured outcome: reduced document review time by 60 percent.
